Certifications

Data Visualization Using Python

Graph Data Modeling

LangChain for LLM Application Development

LLMOps Basics

Microsoft Certified: Azure Fundamentals

Publications

Sentimental analysis based review classification

Extracting key aspects of Consumer Complaints using Text Classification Techniques

Patents

A SYSTEM AND METHOD FOR INFORMATION EXTRACTION AND KNOWLEDGE ORGANIZATION IN BIOMEDICAL LITERATURE

Srinivas Muralidharan

Data Analytics and AI Specialist | AI Researcher | Data Engineer | Research in NLP, Knowledge Graph and LLM

Amsterdam Area

Summary

As a Data and Analytics Specialist, I carry an expertise in creating data driven solutions for various organizations by incorporating generic components, leveraging Python and PySpark libraries. I also collaborate with multiple domain teams to provide support and guidance on the utilization of the data tools, aligning it with their analytical and data science needs. In addition, I play a pivotal role in addressing data-related issues and research in Natural Language Processing and LLM.

I have a strong Data Science background with a Master's degree in Artificial Intelligence from Vrije Universiteit Amsterdam, where I learned and applied various machine learning algorithms, feature engineering techniques, and natural language processing methods. I also have a certification in Data Analytics from Johan Cruyff Institute, where I gained practical skills in data analysis, statistical modelling, and data visualization using SQL, Python, and R. Previously, I worked as a Data Engineer at Macaw and as an AI Research Scientist at DEKU, where I was involved in projects related to Fintech, FMCG, and Epublishing industries. I have a passion for research and development, and I have multiple certifications and publications in machine learning and geospatial analysis.

Experience

Mars Veterinary Health

Data Engineer / Data Scientist

April 2024 - Present (1 year 10 months)

Amsterdam, North Holland, Netherlands

Led the strategic, cross-regional Referral Project, architecting a scalable data product used across Europe to understand referral behavior, patterns, and revenue impact. Drove end-to-end delivery—from stakeholder alignment and requirement gathering to data modeling and production pipelines in Databricks.

As a Data Scientist Built and maintained the organization's Product Classifier, leveraging Hugging Face transformer models to categorize veterinary medical products with high accuracy. Improved model performance and ensured smooth deployment, monitoring, and retraining cycles.

Designed and implemented a full MLOps framework using Databricks, MLflow, Delta Lake, and CI/CD principles—standardizing experimentation, versioning, model registry workflows, and automated deployment across the team.

Optimized existing jobs and pipelines, reducing compute cost and execution time through cluster tuning, caching, modularization, and refactoring of high-usage workloads.

Led the Vaccination Reminder Project, building an automated dataset and SFTP pipeline (DnA → I-Link → ACIP → Salesforce/Axenon) to power targeted vaccination reminder communication flows for customers across multiple PMS systems.

Delivered Consent Management workflows, ensuring accurate reconciliation of Salesforce client data with internal systems by implementing multi-layer matching logic and data quality validation.

Introduced a Google Maps Scraper Solution using Selenium and modular Python design to extract competitive pricing and clinic-level insights across Nordic and Dutch markets—fully integrated into Azure/Databricks workflows.

Drove cross-team coordination between Data Engineers, Analysts, ACIP, I-Link, Axenon, and business owners to ensure smooth delivery, clear communication, and alignment with operational and marketing objectives.

Contributed to data governance/Quality, pipeline reliability, and documentation, including reusable frameworks for engineers and ML practitioners.

DEKU

AI Research Scientist

January 2021 - September 2024 (3 years 9 months)

Chennai, Tamil Nadu, India

1. Involved with the research of Tally based data solutions for Medium Scale Industries.

2. Building and research on functions and python codebase to automate tally data to sql data warehouses for business users (Analysis and Data Science use cases).
3. Currently research on LLM/NLP based solutions to integrate Q and A application for tally based data which retrieves anomalies and responses to user questions based on LLM or inspiration from GPT models.

FrieslandCampina

Data and Analytics Specialist

January 2023 - April 2024 (1 year 4 months)

Amersfoort, Utrecht, Netherlands

1. Proficient in enhancing a data engineering library by incorporating generic components, leveraging Python and PySpark libraries.
2. Involved in codebase refactoring to optimize the Generic Components library for data engineering use cases.
3. Collaborated with multiple domain teams to provide support and guidance on the utilization of the Generic Component library, aligning it with their analytical and data science needs.
4. Played a pivotal role in addressing data-related issues and making data-driven decisions from a data engineering perspective.
5. Served as a data engineer within the MNQ Team, facilitating data preparation for Power BI reports and various analytics initiatives.
6. Also contributed to the development of Generic Components library version 2.0 using Test-Driven Development (TDD) principles.
7. Contributed to the deployment of pipelines for the Generic Components library, ensuring smooth integration into the data ecosystem.

Macaw

Data Engineer

February 2022 - January 2023 (1 year)

Hoofddorp, North Holland, Netherlands

FrieslandCampina

AI Intern - (NLP)

March 2021 - August 2021 (6 months)

Amsterdam, North Holland, Netherlands

Fast Facts

Data Scientist Intern

June 2020 - March 2021 (10 months)

Chennai, Tamil Nadu, India

Amazon

Quality Assurance Associate

May 2018 - May 2019 (1 year 1 month)

Chennai Area, India

Infosys

System Engineer Intern

January 2018 - June 2018 (6 months)

Mysuru Area, India

Tata Consultancy Services

Data Scraper Intern

June 2017 - October 2017 (5 months)

Chennai Area, India

Newgen KnowledgeWorks Pvt Ltd

Developer

January 2016 - June 2016 (6 months)

Chennai Area, India

Education

Vrije Universiteit Amsterdam (VU Amsterdam)

Master's degree, Artificial Intelligence · (January 2019 - August 2021)

Johan Cruyff Institute

Data Analytics · (October 2021 - December 2021)

SRM University

Bachelor of Technology - BTech, Computer Science · (2014 - 2018)
